Completion Certificate

Developed enterprise-level web applications utilizing Java, Servlets, JSP, JDBC, and MySQL with emphasis on MVC architectural patterns.

Implemented comprehensive CRUD operations, session management, and database design for applications.

Designed and integrated responsive front-end interfaces using HTML/CSS with backend services.

Conducted thorough debugging, testing, and deployment processes on Apache Tomcat server environment.

AI&ML WITH PYTHON

PROJECTS

Student Placement Management System

Tech Stack: Python, Sqlite

Github: [<https://github.com/vasanthalakshmii/student-placement-management-system> 🔗]

Student Placement Management System is a software application designed to manage and automate the placement activities of colleges and universities. It helps students, placement officers, and companies interact through a single platform. The system stores student details, company information, job opportunities, interview schedules, and placement results efficiently.

CERTIFICATES

.Wadhwani Certificate
.Workshop Project
.AWS internship certificate
.NPTEL certificate

ACHIEVEMENTS

- . Developed a Student Placement Management System using python and sqlite
- . Participated in Technical Fest as a volunteer
- . Created and uploaded projects on github.com
